E. RATIONALE FOR DISPOSITION

The 18-acre site was owned and operated by Olin Corp. from 1950 to 1972 for formulation of pesticides. The property was subsequently sold and subdivided. Pesticide residues have been found in drainage ditches along the eastern and northeastern boundaries of the site. Sample results have shown toxaphene to 200,000 ppm, heptachlor (PCNB) to 100,000 ppm, DDT/DDD to 5,000 ppm, and numerous other pesticides at low levels. A Hazard Ranking System package was prepared for the site; however, the score fell below the level necessary for submission as a NPL candidate. As a result, the site was referred to the Texas Waste Commission for followup action. TWC is currently reviewing the Scope of Work submitted by the potentially responsible parties and is in the process of enforcing cleanup of the site.
